PROFESSIONAL
SUMMARY

Third-year Computer Science student at the National and Kapodistrian University of Athens, specializing in algorithms, performance engineering and software systems. Founder of a web studio delivering production sites for real clients — including a trilingual law firm and an academic portfolio — while building systems-level projects in C/C++ (simulations, algorithmic solvers, number-theory tooling). I design efficient, scalable solutions and care about correctness, clean architecture and measurable results. Available for internships and junior engineering roles.

PROJECTS

Selected work — code at github.com/Mariosgian

01 Self-Driving Car Simulation

C++ · OOP · SENSOR FUSION

Object-oriented simulation of an autonomous vehicle using sensor fusion and GPS-based navigation logic.

02 Protein Synthesis Simulator

C++ · OOP · MODELLING

Simulation modeling transcription and translation processes using object-oriented design principles.

03 Traveling Salesman Solver

C++ · HEURISTICS · OPTIMIZATION

Heuristic algorithms for route optimization, with an analysis of the performance trade-offs.

04 Factorization Algorithm

C++ · NUMBER THEORY · COMPLEXITY

Optimized integer factorization program focused on efficiency and time complexity.

LANGUAGES

Greek
NATIVE

English
FLUENT — C2

French
FLUENT — B2

RELEVANT COURSEWORK

Algorithms & Theory	Algorithms & Complexity, Advanced Algorithms, Data Structures & Programming Techniques, Theory of Computation, Computational Complexity, Discrete Mathematics
Systems	Operating Systems, System Programming, Computer Architecture I & II, Parallel Systems, Compilers
Software Engineering	Object-Oriented Programming, Software Analysis & Design, Software Technology, Principles of Programming Languages
Data & AI	Database Design & Implementation, Artificial Intelligence, Machine Learning Foundations, Data Mining, Web Application Technologies
Security & Math	Cryptography, Computer Systems Security, Linear Algebra, Probability & Statistics

TECHNICAL SKILLS

PROGRAMMING LANGUAGES	C, C++, JavaScript, Python, Java, HTML5, CSS3, SQL
COMPUTER SCIENCE	Data Structures, Algorithms, Object-Oriented Programming, System Design Fundamentals, Memory Management, Operating Systems, Debugging
WEB DEVELOPMENT	HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React, Node.js, Responsive Design, Accessibility, SEO Basics
TOOLS & TECHNOLOGIES	Git, GitHub, Linux / CLI, VS Code, Figma, MySQL, npm
PROFESSIONAL SKILLS	Problem Solving, Analytical Thinking, Communication, Team Collaboration, Time Management, Adaptability, Fast Learner

EXPERIENCE

Sept 2025
— Present

Athens, Greece

Pixel Node Studio

Founder & Web Developer

- Designed and developed **6+ responsive websites** using HTML, CSS, JavaScript and Tailwind CSS.
- Built multilingual, multi-page websites with mobile-first design.
- Implemented SEO optimization and performance improvements.
- Used Git and GitHub for version control and deployment workflows.
- Translated client requirements into technical solutions and wireframes.
- Managed the full development lifecycle: design → development → testing → deployment.
- Collaborated directly with clients and communicated technical solutions clearly.
